

## DOCKLANDS LINE (LINE C1) CONNOLLY TO THE POINT

### Mayor St Bridge Contract at George's Dock

The Contract is due to be signed at the start of May and the Contractor will be on site, before the end of the month, to carry out the bridge modifications required to accommodate the future Luas Line C1. The works will require a closure of Mayor St at George's Dock. During this period traffic will be diverted around Mayor St and pedestrians will be accommodated on a temporary pedestrian bridge across the dock.

These works have been postponed until after the Docklands Fun Run which will take place Tuesday 22nd May 2007 at 7.45pm.

### Utilities Diversions and Protection Works

It is expected that the Contract to carry out the utility diversions and protection works will be awarded by the end of May and works on site will commence shortly thereafter. When Construction commences there will be local, partial street closures to carry out the works and details will be circulated to interested parties following discussions with the successful Contractor. Pedestrian and service access to existing buildings will be maintained and car parks will remain operational.

### Main Civil and Track Works

It is expected that the main Civil and Track Contract will be awarded around the end of the year and works will continue throughout 2008 and into 2009 when the Mechanical and Electrical systems will be installed and tested.

The project is due for completion at the end of 2009.

Further updates will follow as the planning and the works continue.
