

Mater D-Wall Construction Update

Delivery of more D-Wall equipment

Dates: Sunday 12th & Monday 13th February

Duration: 2 hours

Location: On site

RPA wish to inform you that we will take delivery of more diaphragm wall equipment on Sunday evening and early Monday morning. The precise delivery times are dependent on the arrival time of ferries at Dublin Port

Due to Dublin City Council traffic restrictions abnormal loads that are expected on Monday can only be delivered to site before 6am on Monday morning. The equipment will be off loaded in a similar fashion to the delivery last weekend.

We apologise in advance for any inconvenience that may be caused.

If you have any queries about the upcoming works please contact me directly.
